

# PREDICT

THE WORLD'S MOST COMPREHENSIVE  
ZOO NOTIC DISEASE SURVEILLANCE &  
CAPACITY DEVELOPMENT PROGRAM

**TRAINED** 3,300 government personnel, physicians, veterinarians, resource managers, laboratory technicians, and students in One Health skills including biosafety, surveillance, lab techniques, and disease outbreak investigation.

**SAMPLED** 74,000+ at-risk people, live-stock, and wildlife (nonhuman primates, bats, rodents, and other wild animals (including bushmeat samples) at human-animal interfaces with high-risk and opportunity for viral spillover.

**DEVELOPING & OPTIMIZING** low-cost methods for the detection of viral threats like Ebola and influenza and for the discovery of new viruses with 60 labs including those in national lab systems in up to 30 countries around the world.

**DETECTING** more than 1,000 unique viruses in animals and humans: 820 novel viruses and 182 known viruses (including Ebola and SARS) – the most comprehensive viral detection and discovery effort to date.

820 NOVEL

182 KNOWN
